SMART CHAIN
Blockchain Technology

FORSAGE.IO

Forsage is the # 1 networking platform in the world, powered by decentralized smart contract technology on blockchain.

Forsage has about **1.7 million people** members coming from more than 200 countries around the world who have changed their lives by teaming up and becoming financially independent. Each Forsage member has created their own highly profitable and risk-free Online Cryptocurrency Earning Business!

DECENTRALIZATION

The platform, built on blockchain technology, works with smart contracts and allows you to open up 100% opportunities to generate profits. Absence of administrators and centralized forms of management allows the community to be as free and independent as possible.

SECURITY

Forsage smart contracts not only instantly distribute profits to the participants' wallets, but also provide a guarantee of security from outside interference, while confirming that the Platform has no balances, withdrawals, or commissions.

EFFICIENCY

There are no limits on the amount of income, there are no commissions from the Platform itself either. The efficiency provided by Forsage is beyond competition, the cross-platform and functional interfaces make your Business more comfortable.

TRANSPARENCY

The open aspects of readable Forsage source code and easily viewable transactions on blockchain are not only a guarantee of the security of receiving income, but also of transparency. This allows you to track all the actions and statistics of the platform (and) as well as view any account in real-time.

EQUALITY

It's never too late to get started with Forsage! The platform proves that even a freshly registered member can make tens and thousands of dollars in a matter of weeks or even days!

FORSAGE

DECENTRALIZATION

What is decentralization? What are its benefits and advantages? Decentralized marketing is created on an automated contract that guarantees you maximum security and stability.

A smart contract is an algorithm with automatic execution. It exists inside the Smart Chain blockchain*, which is one of the top cryptocurrencies. Smart contracts, like cryptocurrencies themselves, are decentralized. They work strictly according to a certain program, and once they are launched, it is impossible to change their mode of operation. The code that determines the logic of a smart contract is written in a blockchain, and all calculations are performed by millions of computers around the world. This ensures that a smart contract cannot be hacked or stopped.

* Blockchain is an immutable register of transactions and information, protected from any further manipulation by cryptographic methods. It is simultaneously maintained by thousands of independent computers around the world.

WHAT IS A BUSD TOKEN

BUSD is a cryptocurrency with a fixed exchange rate that is equal to $1. It has a fully verified code and is approved by the New York State Department of Financial Services.

5 benefits of BUSD for Forsage:

1. Fixed Cost. Your Forsage performance is no longer affected by rate fluctuations and market corrections.

2. All the opportunities that cryptocurrency provides. BUSD token can be exchanged for any cryptocurrency on DEX exchangers with negligible fees in a couple of clicks.

3. Simple calculations. Registration fees, upgrades, and cycles are now specified in US Dollar equivalents.

4. Precise planning. You can accurately track costs and estimate results without wasting time converting from one unit to another.

5. Protection of participants' interests. BUSD is fully backed by the US Dollar at a ratio of 1:1 and can always be exchanged for Dollars. It was created in a Paxos and Binance partnership.

FORSAGE BUSD MARKETING

Forsage marketing is implemented on the Smart Chain blockchain smart contract technology. The marketing employs the BUSD token in the BEP-20 format with a stable exchange rate of 1 USD. To send BUSD or any other token functioning in the Smart Chain blockchain, you will need a certain amount of BNB to pay the fee.

BNB — This is the internal BEP-20 format coin of the Smart Chain blockchain, which is required to pay the transaction fee.

BUSD — This is the BEP-20 format Smart Chain blockchain coin with a stable rate of 1 USD.

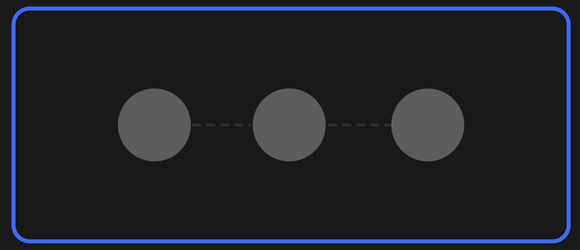
FORSAGE BUSD MARKETING

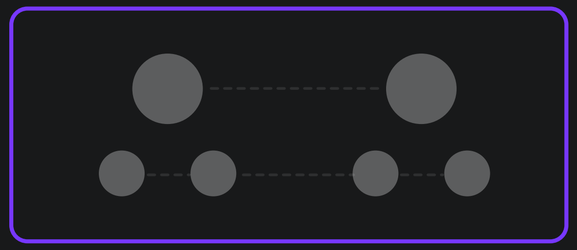
Forsage marketing is a matrix system based on decentralized smart contract technology. Profits come from inviting new partners to your team, who once registered stay with you forever since it is recorded in blockchain. The income is distributed automatically and instantly to the personal wallets of the participants.

Participants have access to 4 marketing programs, different in terms of profitability and conditions of interaction between partners. The most efficient method is to use all of these programs in parallel.

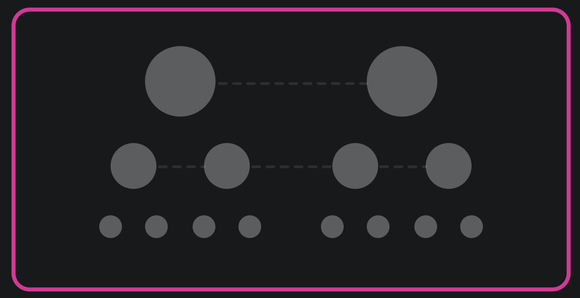
x3 Program



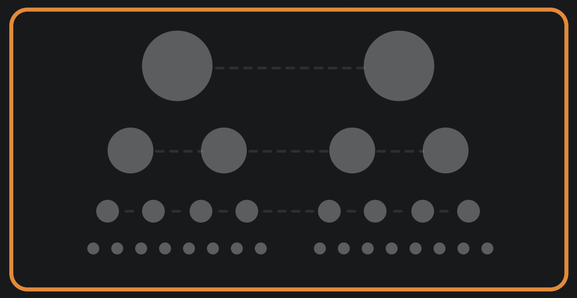
x4 Program



xXx Program



xGold Program



The validity of the levels is not limited. By activating any level of the program once, it is assigned to you forever and does not require any additional rewards.

Higher levels = more income. Marketing income is generated from the value of the level in which your partner took a spot. Therefore, working at higher levels increases your results. Marketing is built in such a way that income from one cycle is enough to activate the next level.

Automatic cycles at all levels. The levels of each program contain a fixed number of spots. As soon as all the spots in the level are filled, a new cycle automatically begins.

The number of cycles is not limited. A level activated once allows you to invite an unlimited number of new partners.

Referral link. All personal partners whom you invite are assigned to you forever, and this cannot be changed, since it is recorded in a smart contract.

FORSAGE BUSD REGISTRATION

Smart Contract. Forsage platform is based on smart contract technology. Forsage smart contracts are programmed in such a way, that they never store participants' funds, their balance is always zero. The purpose of the smart contract is to automatically redirect funds from incoming transactions to the wallets of other participants, according to marketing program rules.

Referral linking. Also, your referral linkage remains unchanged, you can't change your upline partner, as well as your downline partners are assigned to you in your structure forever.

Personal Wallet. To become a member, you need to create your personal wallet. Detailed instructions can be found here: https://support.forsage.io/hc/en-us/categories/360003112100-FORSAGE-BUSD

Only you have access to the funds. All rewards according to marketing are instantly credited to your personal wallet. All transactions are stored in the public domain in a blockchain. You can easily check each transaction and see where the funds have been transferred.

FORSAGE.IO BUSD

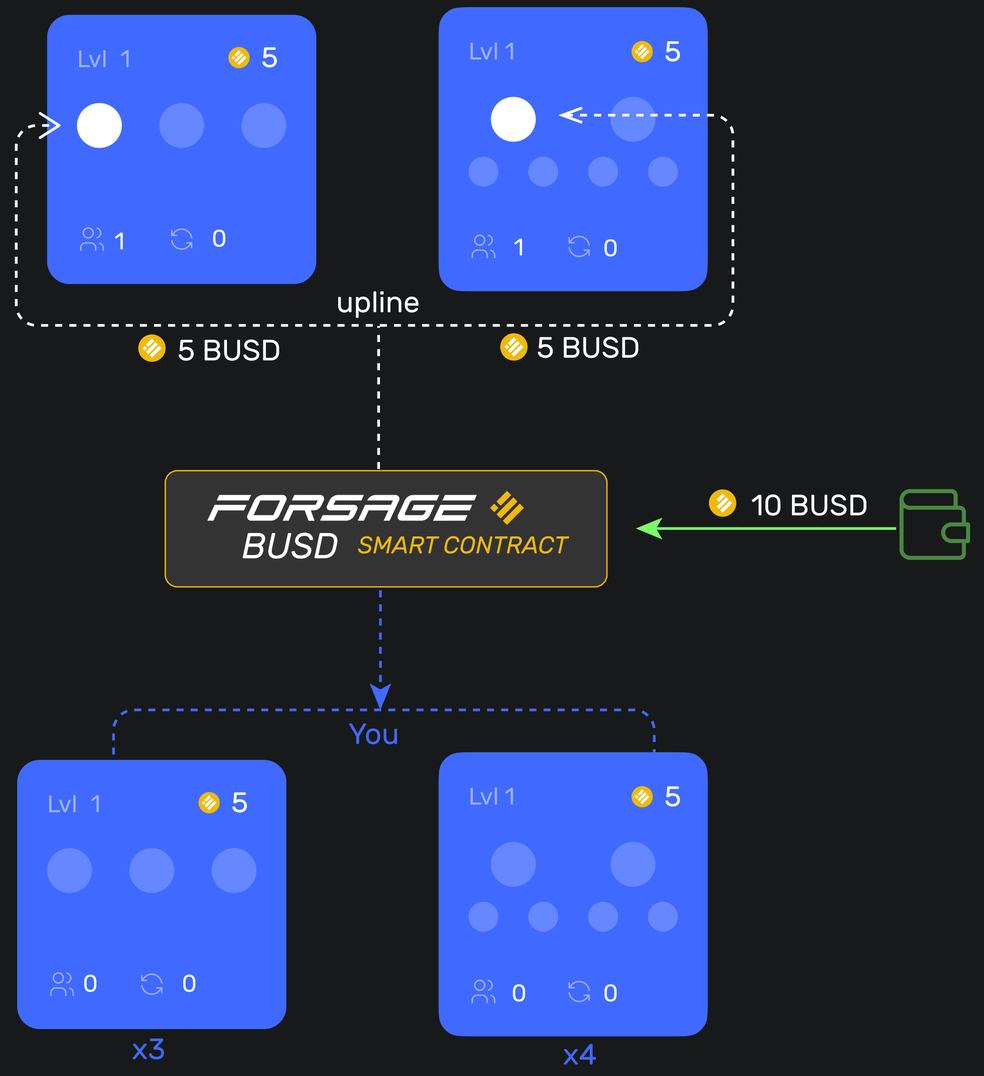
FORSAGE BUSD REGISTRATION

Registration in Forsage BUSD is the activation of first levels in Forsage x3 and x4 programs, which cost 5 BUSD each.
In total, registration costs 10 BUSD. The first levels in x3 and x4 programs are always activated together and cannot be accessed separately. All the following levels can be purchased one by one, in ascending order.

Registration transaction is credited to the smart contract. The smart contract records your wallet number into the structure and redirects the funds to the personal wallet of the person that invited you (your upline partner). You occupy a free spot in their first level of x3 program and first level of x4 program. Level 1 of x3 and Level 1 of x4 are respectively opened for you, and now you can invite partners through your personal referral link.

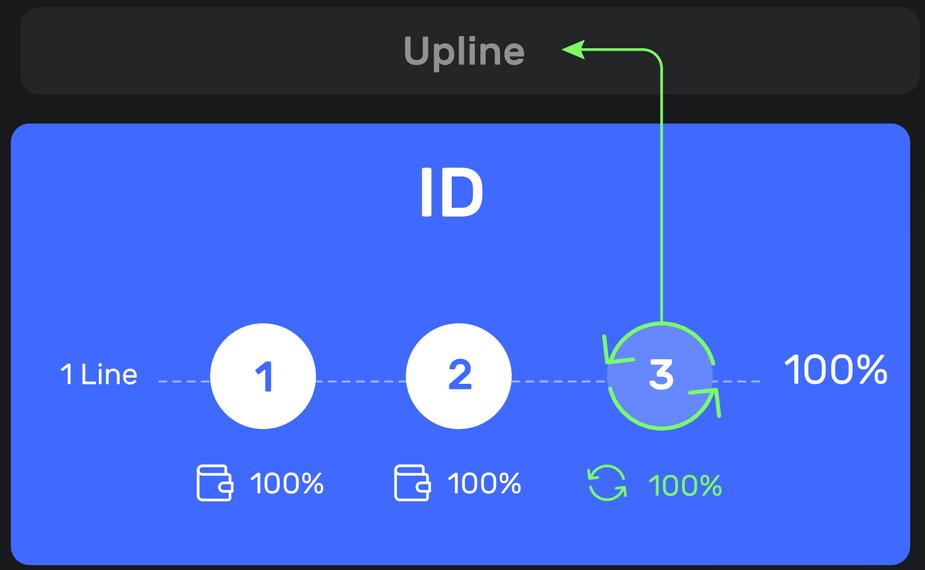
After activation of the first levels of x3 and x4 programs, the xXx program activation becomes available. After you activate xXx, activation of xGold program becomes available.

Detailed registration instructions can be found here:
https://support.forsage.io/hc/en-us/categories/360003112100-FORSAGE-BUSD



FORSAGE.IO
BUSD

x3 PROGRAM



Levels: 12 **Lines:** 1 **Spots:** 3

Yield per cycle: 200%

All partners in your Forsage x3 program levels are the people whom you've personally invited. When partners register in the program using your referral link, they take spots below you.

Distribution of rewards when filling each spot in a level of the program is as follows:

1 — 100%

The first partner you invite is placed on the first spot below you. Reward of 100% goes to your personal wallet.

2 — 100%

The second partner is placed on the second spot below you. You also get 100% reward to your personal wallet.

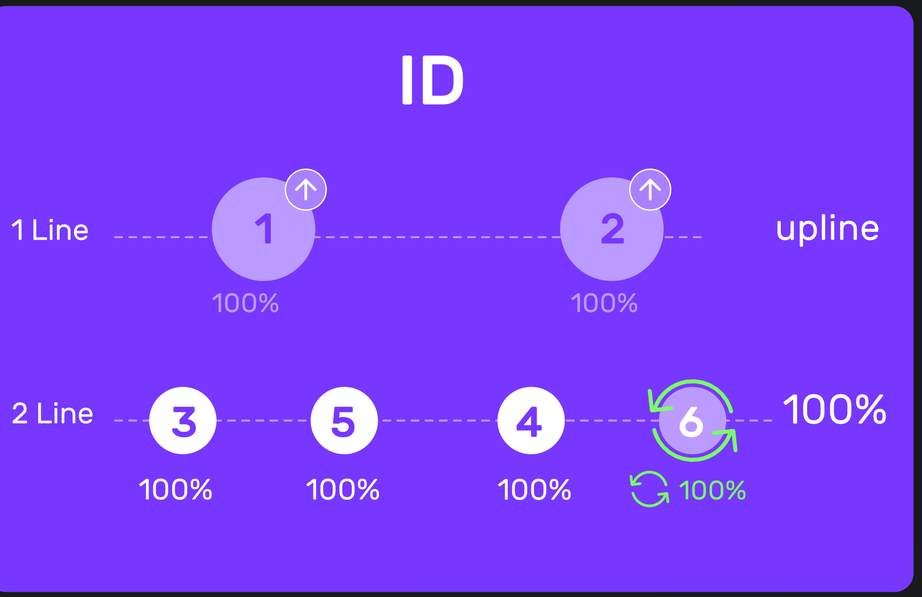
3 — 100%

The third partner is placed on the third spot below you and completes the cycle. 100% of the income goes to your upline partner's wallet, and a new cycle immediately begins for you, and you can fill up the spots again by inviting new partners.

Likewise with your partners. Each time your partner completes the cycle of their level, you receive a reward to the wallet in 100% of the level cost, and the partner opens the new cycle again. At the same time, this partner takes a new spot below you. Thus, the same partner can occupy several spots in a row in your levels.

FORSAGE.IO
BUSD

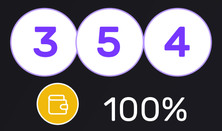
x4 PROGRAM



Levels: 12 **Lines:** 2 **Spots:** 6
Line 1 - 2 spots
Line 2 - 4 spots
Yield per cycle: 300%

In Forsage x4 program you can invite personal partners, as well as receive spillovers from above and below.

The partners who occupy two spots below you in the first line are also in the second line of your upline's level. Reward of 100% goes to upline's wallet. By the same principle, you receive income not from the first, but from the second line.



Rewards from partners who occupy these spots instantly go to your wallet in the amount of 100%.

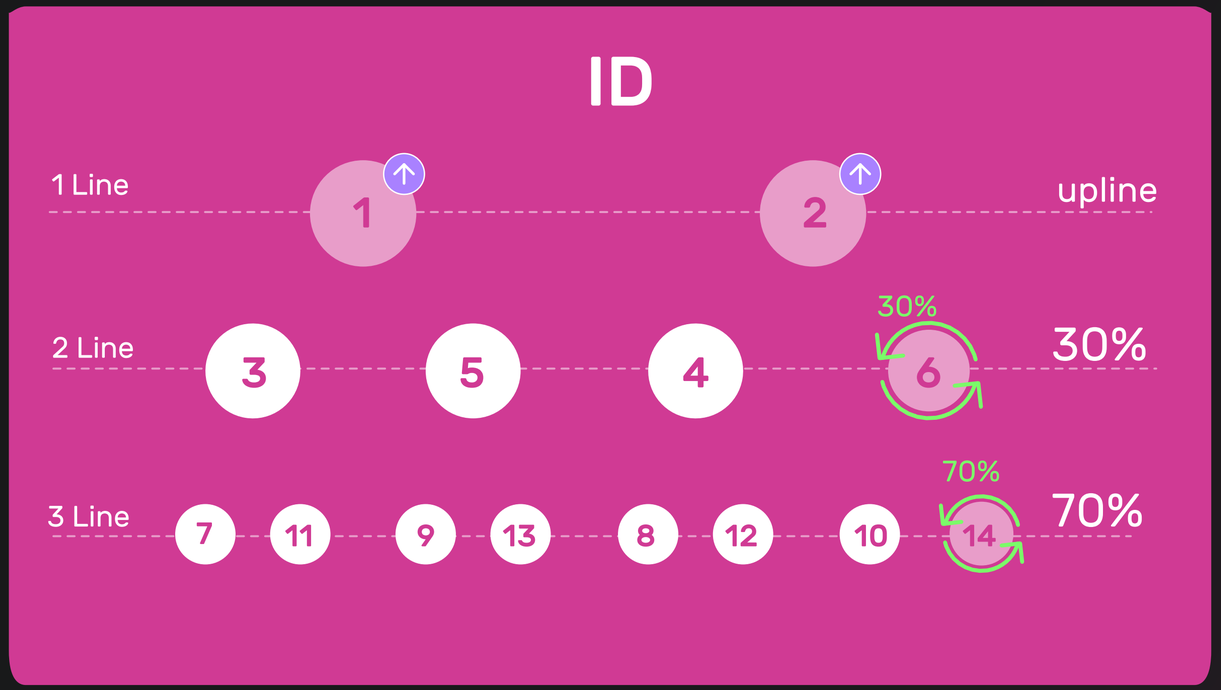
The partner completes the cycle of the level, the reward of 100% goes to your upline, and the new cycle begins for you.

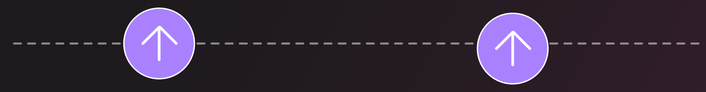
When a partner on the 2nd line joins your upline, they take a place in your 1st line — that is, you receive a spillover from above.
Similarly, a spillover can come from below. When a partner comes to your downline on the 1st line, then they will take a place on your 2nd line. Thus, places in the x4 levels can be occupied by people invited only by you, or there can be none invited by you, or mixed.

Don’t forget to activate next level so that you don’t miss the rewards from the previous one when its first cycle completes.

FORSAGE.IO
BUSD

xXx PROGRAM



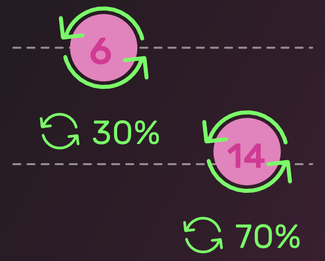


First line (2 spots): rewards go to your upline partners.

Second line (4 spots): you get 30% of the level cost from each of the four partners, and 70% goes to the upline, since for him they are partners of the 3th line.

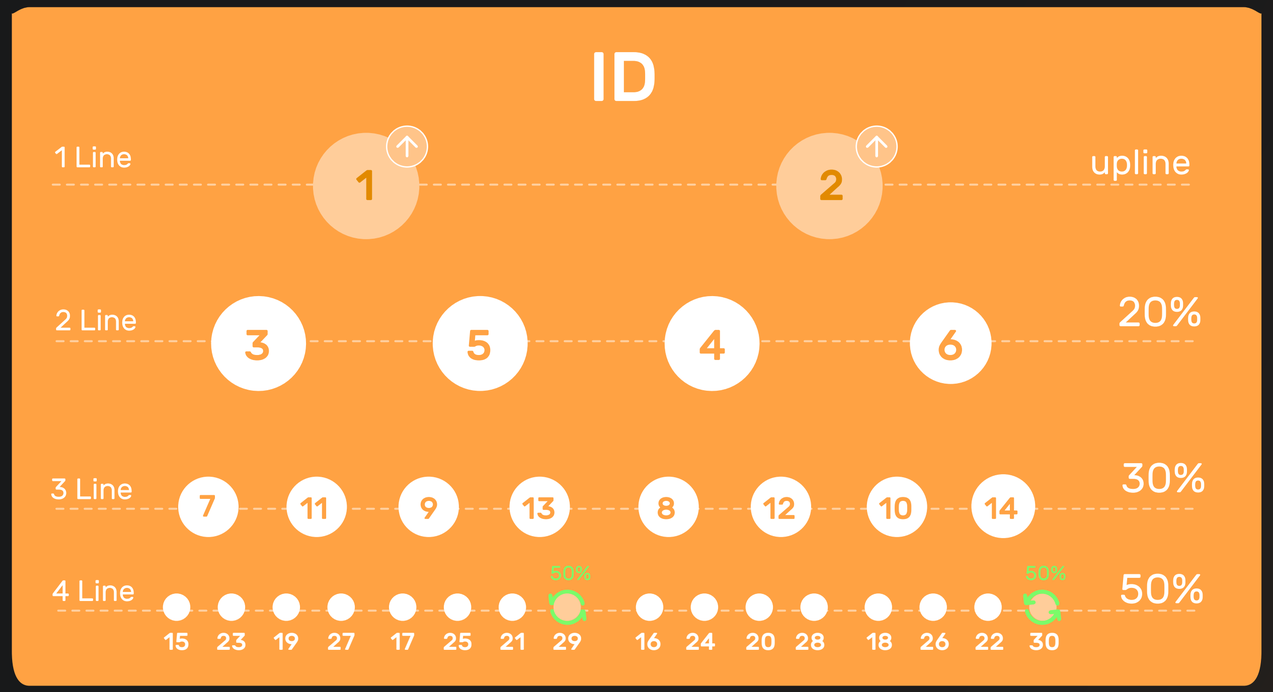
Third line (8 spots): you get 70% from each, 30% goes to the upline.

Levels: 12 **Lines:** 3 **Spots:** 14
Line 1 – 2 spots (to the upline partner)
Line 2 – 4 spots (30%)
Line 3 – 8 spots (70%)
Yield per cycle: 580%



xXx cycle: The final reward from the 2nd line (30%) and the final reward from the 3rd line (70%) are summed up and distributed to the upline partners, and a new cycle opens for you.

xGOLD PROGRAM



The advantage of xGold program is a larger number of partners and spillover opportunities, which generates an income of 1020% from one cycle of the level.

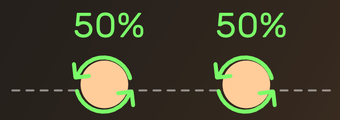
First line (2 spots): rewards go to your upline partner.

Second line (4 spots): you get 20% from each spot.

Third line (8 spots): you get 30% from each spot.

Fourth line (16 spots): you get 50% from each participant (30% and 20% are distributed to upline partners).

Levels: 15 **Lines: 4** **Spots: 30**
Line 1 – 2 spots (to the upline partner)
Line 2 – 4 spots (20%)
Line 3 – 8 spots (30%)
Line 4 – 16 spots (50%)
Yield per cycle: 1020%



xGold cycle:
The last 2 spots from the 4th line (50% + 50%) are summed up and 100% is distributed to upline partners, and a new cycle of the level begins automatically.

FORSAGE.IO
BUSD

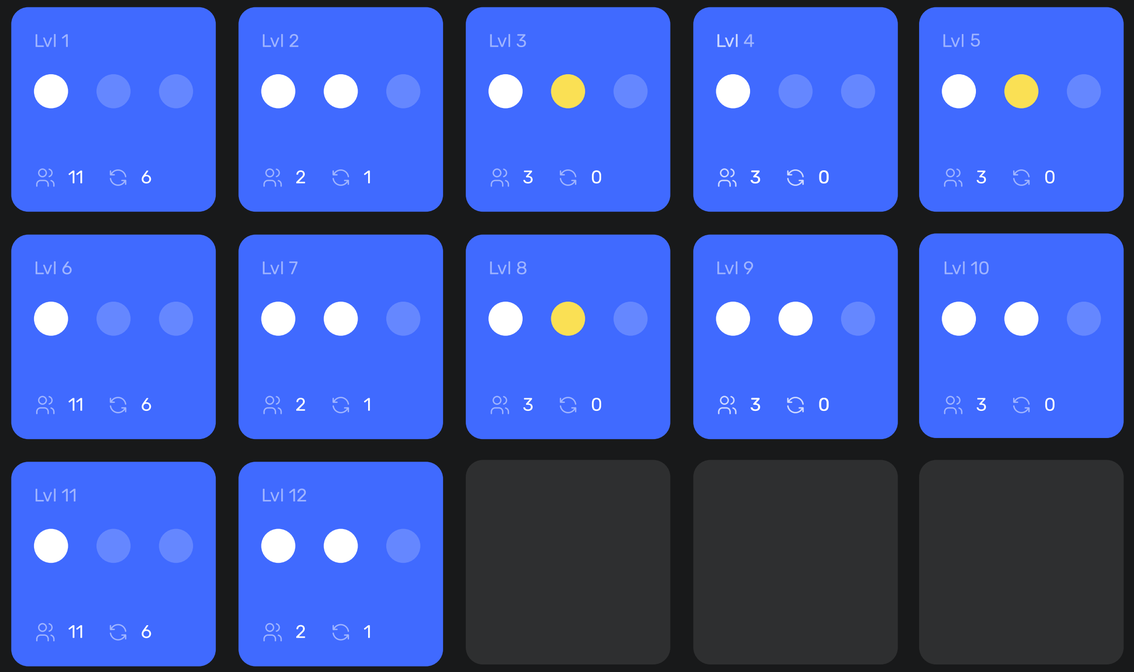
HOW LEVELS WORK

x3 - has 12 levels
x4 - has 12 levels
xXx - has 12 levels
xGold - has 15 levels

All programs have levels that work on the same principle but differ in the cost of activation. Completing the full cycle of the level brings enough profit to activate the next level, and gives you the opportunity to earn 2 times more.

Activating several levels and inviting partners to those levels at once speeds up your profit by many times. The levels do not have a validity period, so you should not be afraid that they will expire. Each active level constantly brings you income. How many levels can be activated at once? As many as you want, even all at once.

One should bear in mind that you can open levels only in sequential order — for example, you can't go to the fourth level without opening the third one.

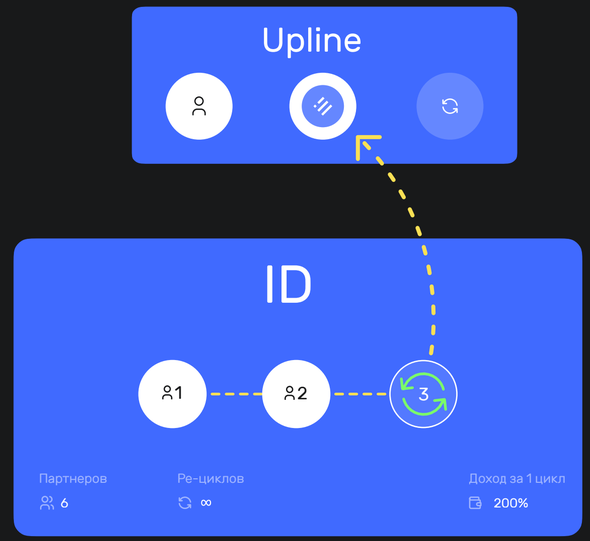


Be careful, if you have not yet activated a certain level, and your partner activates it earlier, then overtaking will occur, and you will miss the reward.

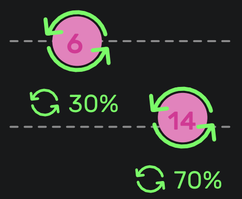
HOW THE AUTOMATIC CYCLES WORK

Automatic cycles open the same level for you, and you continue to receive income from it. This happens automatically as soon as the last free spot under you is taken by a partner. The current level completes its cycle, and the next cycle begins.

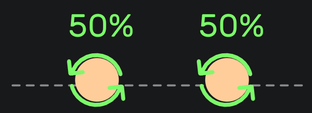
When a cycle is completed, you occupy a free spot in the level of your upline partner. And you have your level reopened with free spots for new partners. For each cycle, a reward of 100% goes to your upline partner's wallet. Cycles work in the same way for your invited partners, and each time their level completes a cycle, you receive a reward for it.



After the first cycle of a level, you will receive rewards for new partners at the same level only if your next level is activated in the program. Therefore, it is important to make upgrades in advance so as not to miss out on rewards.



How cycles in xXx work. For automatic activation of the level after a cycle in xXx program, you need 100% value of the level. The first amount of 30% from last partner on the 2nd line is temporarily blocked on a smart contract, and as soon as the second amount of 70% from last partner on the 3rd line arrives, the cycle is automatically closed, and 100% for it instantly goes higher in the structure.



How cycles in xGold work
For automatic activation of the level after a cycle in xGold program, you need 100% cost of its activation. Rewards from the last two partners on the 4th line are summed up (50% + 50%) for this activation.

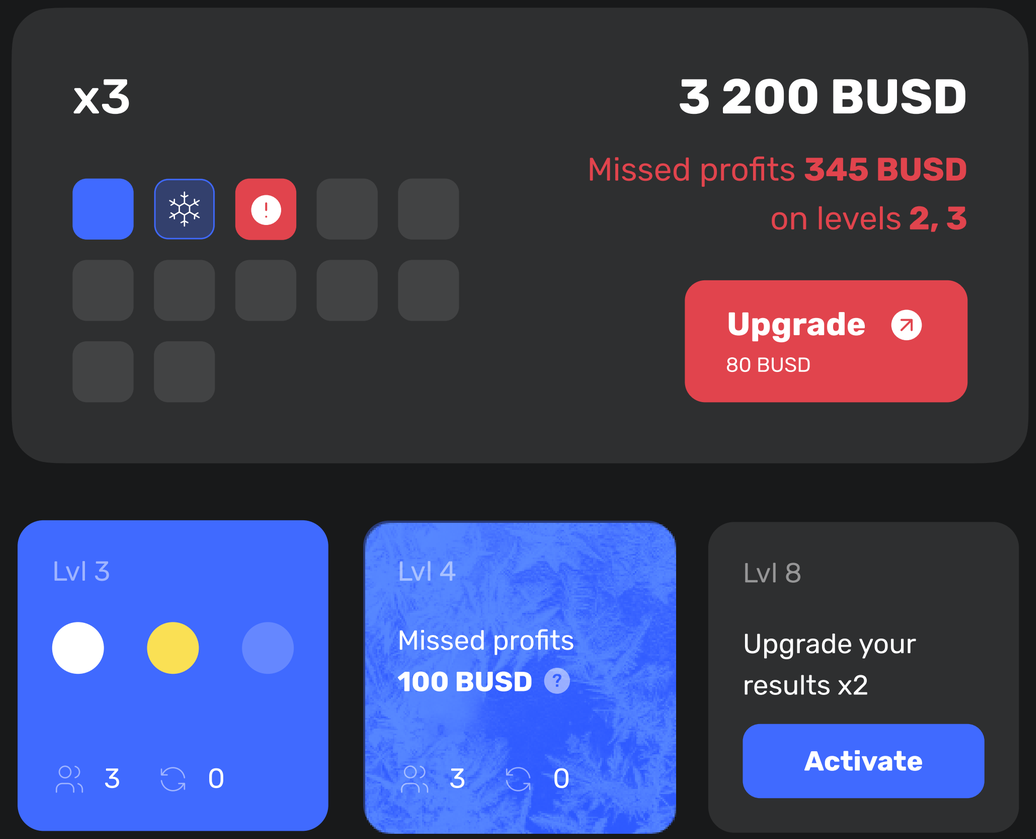
UPGRADE

UPGRADE is the activation of the next more expensive level. Income from 1 cycle of each level is enough to upgrade to the next level. The reward for the upgrade goes to your upline partner, provided that they already have this level activated. You get to decide whether to activate the next level or not. But if you do not have the next level open, then the rewards from second cycle of this level will be redirected to the upline partners.

If you miss a reward from new partners due to lack of upgrade, then referral linking allows you to get your partners back. When you upgrade to the next level, your referral partner will take a place below you in their next cycle, and will follow you with each next cycle.

You can overtake your upline partner by activating levels they have not yet activated. In such a case, you will occupy a spot in their closest upline partner's level, provided that this partner has such a level activated. The reward goes to him instead of your direct upline.

LEVEL FREEZE



Level freeze occurs if the partners have taken all the spots in the level completing the first cycle, but the next level is not activated (lack of upgrade).

When “frozen”, the level remains inactive. Partners continue to occupy spots in your level but you miss out on profits from this level until the next level is activated.

Exceptions include the last levels in Forsage programs (12th or 15th in xGold).

LOST PROFIT AND EXTRA PROFIT

Lost profits are cases when you miss rewards for partners, and they are redirected to an upline partner.
Lost profits can occur for two reasons:

Overtaking: You have not activated the level that your downline partner has activated. This reward goes to the closest upline partner who activated this level.

Freezing: Your level is completely filled, and the 1st cycle has been completed, but the next more expensive level is still not activated.

After you activate the level, your partner will come back to you again in his next cycle.

Extra profit is a reward that comes to you from below, because one or more of the downline partners have lost their profits. Thus, you can gain extra profits from the depth of your structure when your downline is overtaken, and you are the first in your structure who has this level activated. Therefore, activation of higher levels allows you to receive such rewards for overtaking from downline partners.

SPILLOVERS

Spillovers is a process when spots in your levels are occupied not only by your personally invited partners, but also by partners invited by the other members of your team. Forsage marketing programs allow you to receive spillovers from both your upline and downline partners in x4, xXx and xGold.

Personal partner is a person who registered with your personal affiliate link. They take the closest free spot in the level immediately after your position.

Spillover from above is a personally invited partner of your upline. They take the next free spot in the level of your upline partner, and accordingly get in your level too, but on the higher line.

Spillover from below is a personally invited partner of your downline.

Overtake is a situation when a partner overtakes their upline, and temporarily takes a spot directly below you. If your downline partner has this level activated, in the next cycle this partner will take a place under their direct upline partner.

You can overtake your upline partner, acquiring levels which they have not yet activated. In this case, your reward goes to their closest upline partner, who has such a level activated, and the income goes to them. Referral linking allows you to return everyone to their places. This means that when your upline activates the required level, in the next cycle you will take the spot under them again. Thus, the consolidation of personally invited partners is preserved forever.

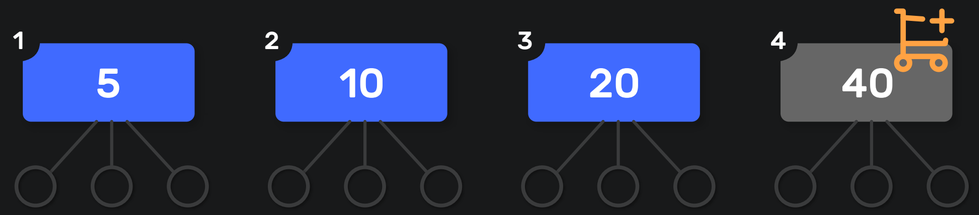
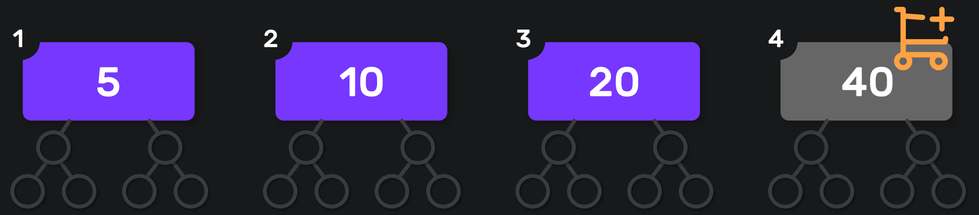
FORSAGE.IO BUSD

HOW MANY LEVELS SHOULD BE ACTIVATED AT THE START?

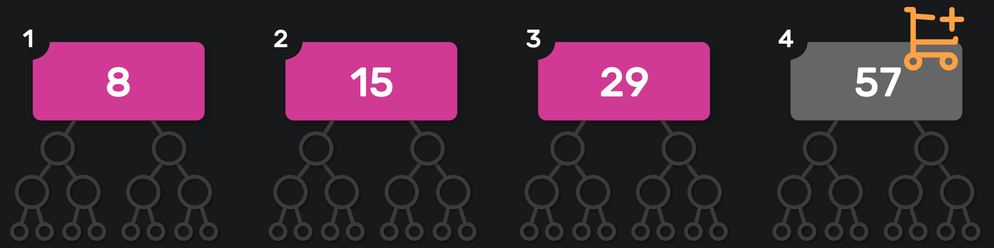
x3



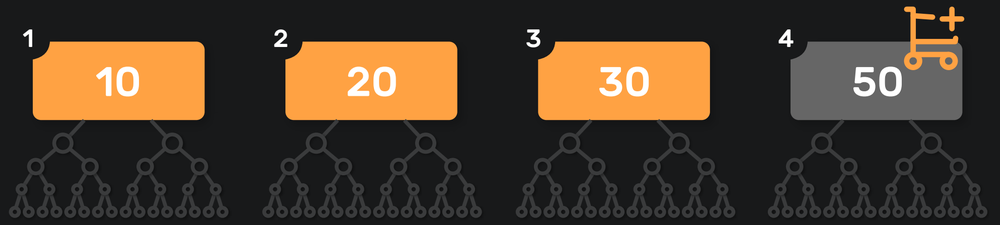
x4



xXx



xGOLD



Of course, you can start with 1 level. But it is recommended to activate at least the first 3 levels right at the start.
This will allow you to get good results from the very beginning.
Such a strategy can maximize your results.

Many successful participants use this strategy of activating several levels from the beginning. They set an example for those below them, and so do they follow. As a result, profits of the whole structure grow much faster. Many start with 5 levels at once, while some start with 7 or even more levels.
